

## New Lancia book: *Lancia Aurelia in Detail*

**By Niels Jonassen, published by Herridge & Sons**

This is the first book in English which deals fully with all versions of the famous Lancia Aurelia, including the Saloon, GT and Spider models, and many of the special-bodied cars. There are detailed descriptions model by model of all the Aurelias from 1950 to 1958.

The full history of the many successes of the Aurelia in motor sport is included, as are biographies of the men behind the Aurelia. There are chapters which put the Aurelia in context, both when it was new and now, and a chapter about owning an Aurelia today.

The 176 page hard-bound book (size 270mm by 210mm) contains over 120 colour and 150 black and white photos. The appendices give details of technical data, as well as chassis numbers and production figures.

The author has owned his Aurelia GT for nearly thirty years, and is the chairman of the Danish Lancia Register. As a professional historian, he offers new insights in the post-war history of the Lancia Company. He has previously written seven books and many articles on motoring subjects, although this is his first title to be published in English. The book will be available by mid-November 2006. You can pre-order your copy, signed by the author, direct from the publishers, by using the form below, or you can order on-line from the web site [www.herridgeandsons.com](http://www.herridgeandsons.com).
